Many of the CottageCutz universal wafer-thin metal dies have been designed as quick and easy to assemble. We call these designs **CottageCutz Made Easy**. In many cases, the design is completed with one shape element. Others require just a few pieces to assemble. Look for the CottageCutz Made Easy throughout the catalog, these items are identified with a brown background behind the name and part number.

UNIVERSAL DIE-CUTTING

COTTAGE Cutz®
Unique & Fun Metal Dies

CottageCutz are Compatible with...

© 2012 The Scrapping Cottage, Inc. CottageCutz is a registered trademark of The Scrapping Cottage, Inc. All other trademarks belong to their respective owners.

TOOLS

CottageCutz dies have been tested and work with QuicKutz Revolution Tool, Sizzix / Ellison Big Shot, BigKick, CuttleBug, SpellBinder Wizard and Accucut Zip'eMate. Additionally, CottageCutz MINIs and 2x2 inch dies work with the QuicKutz Squeeze and the original QuicKutz Hand Tool. 100% guarantee that CottageCutz die work on the above machines. Adapters may be required on some machines; consult the manufacturer's user's manual for more information on using adapters.

Materials

CottageCutz dies have been designed to cut all sorts of paper types from thin printer paper to thick cardstock, adhesive backed paper, vinyl and vellum.

When the ejection foam is removed, the dies can deliver more force and may cut additional materials such as *lightweight* chipboard (*such as cereal box thickness*), cork, craft foam, thin metal / metallic paper, and very stiff/thin specialty fabrics.

FOAM

Ejection foam is included with CottageCutz dies so that paper will not get stuck inside of the die's cutting knife edges. The ejection foam also helps distribute the pressure

All CottageCutz shape dies include ejection foam. If the foam is not already attached, simply peel the backing off the foam and place over the die (the side with the ridges/blades). Align the foam so it is matched up with the die. Press it on with your fingers then insert it into your die-cutting tool. Run the die through your tool without any paper. You may also peel off the excess foam around the edges of the die. Make sure the foam is still on the elements on the die that are small.

You need not worry about this as the foam is only present to ensure paper or other mediums being cut do not become wedged into the die. It is not present to protect or preserve the die, or to protect the user from being cut (as the knife edge is not sharp to the touch). As long as the shape or letter in question is mostly covered, the paper should eject properly.

SHIMS

If your CottageCutz die is not cutting the paper completely, then you may need to use shims. Place a piece of paper, preferably card stock against the smooth side of the die. This will create more pressure when the die goes through the die-cutting tool. Caution: Do not use so many shims that you can not easily move the die through the tool. Follow Manufacturers instructions for using your tool.

FAQs:

Q: What are CottageCutz?

A: CottageCutz are thin metal dies used to create cut-outs of shapes and letters. They can be used with popular die-cutting tools.

Q: What sizes do CottageCutz dies come in?

A: CottageCutz dies come in a variety of sizes, including: Mini (1.75" x 1.75"), 3"x3", 4"x4", 4" x 6", 4" x 8" and 7" long edger sizes. These are approximate sizes as measured in inches.

Q: What die-cutting tools do CottageCutz dies work with?

A: CottageCutz dies have been tested and work with QuicKutz Revolution Tool, Sizzix / Ellison Big Shot, BigKick, CuttleBug, SpellBinders Wizard, SpellBinders Grand Calibur, and Accucut Zip'eMate. 100% guarantee that CottageCutz die work on the above machines. Adapters may be required on some machines; consult the manufacturer's user's manual for more information on using adapters.

Q: What is the purpose of ejection foam?

A: Ejection foam is included with CottageCutz dies so that paper will not get stuck inside of the die's cutting knife edges. The ejection foam also helps distribute the pressure

Q: How do I foam my CottageCutz dies?

A: All CottageCutz shape dies include ejection foam. If the foam is not already attached, simply peel the backing off the foam and place over the die (the side with the ridges/blades). Align the foam so it is matched up with the die. Press it on with your fingers then insert it into your die-cutting tool. Run the die through your tool without any paper. You may also peel off the excess foam around the edges of the die. Make sure the foam is still on the elements on the die that are small.

You need not worry about this as the foam is only present to ensure paper or other mediums being cut do not become wedged into the die. It is not present to protect or preserve the die, or to protect the user from being cut (as the knife edge is not sharp to the touch). As long as the shape or letter in question is mostly covered, the paper should eject properly.

Q: What materials will CottageCutz dies cut?

A: CottageCutz dies have been designed to cut all sorts of paper types from thin printer paper to thick cardstock, adhesive backed paper, vinyl and vellum. When the ejection foam is removed, the dies can deliver more force and may cut additional materials such as *lightweight* chipboard (*such as cereal box thickness*), cork, craft foam, thin metal / metallic paper, and very stiff/thin specialty fabrics.

Q: Where are CottageCutz dies manufactured?

A: CottageCutz dies are manufactured in the USA by the factory that once made hundreds of thousands of dies for other prominent scrapbooking companies. These other companies have since moved their production to China. CottageCutz are the only brand dies still made in USA.
